

Algorithm that will print all the node number having data part that contain even values !

15 August 2020 18:59

```
If start = null
Print overflow
Exit()
End if
```

```
Count <- 0
```

```
Ptr <- start
Repeat Count = count + 1
```

```
If ptr-> data is even
```

```
Print number
End if
ptr = ptr -> address
```

```
If ptr-> address = null
```

```
Exit
```

```
Endif
```

```
end Repeat
```
